

# Undergraduate Training Program for Accounting (Certified Public Accountant Direction)

Major code: 120203K Major name: accounting  
Subject: Management (12) Business Administration (1202)

## 1、 Major Introduction

This major was established in 2013 and has now become an important training base for talents in the registered accounting industry in Henan Province. This major adheres to the original mission of cultivating morality and talents, and insists on the educational characteristics of "aviation as the foundation and the combination of management and engineering". It is committed to cultivating accounting talents with socialist core values, a high sense of social responsibility and the mission of aviation to serve the country, high humanistic literacy and digital innovation practice ability. They have solid professional knowledge and business skills in the field of social auditing, are familiar with domestic accounting standards, independent auditing standards and related economic regulations, master modern social auditing theories, methods and means, and can use digital intelligence technology to engage in social auditing practice and management consulting work in accounting firms, enterprises and institutions. This major highlights the professional characteristics of "accounting+digital intelligence+aviation+manufacturing", serving aviation enterprises and regional economic development, focusing on the cultivation of certified public accountant talents who master digital intelligence technology, and has produced good educational benefits and social impact.

## 2、 Training Objectives

This major cultivates high-quality composite social audit application talents with socialist core values, humanistic heritage, professional ethics, and a sense of aviation mission. Graduates should be capable of fulfilling the requirements of the domestic social auditing profession. After about 5 years of practical experience in enterprise work after graduation, one should grow to possess profound business and digital thinking, master the knowledge foundation of economics, management, law, big data application and analysis, have solid professional knowledge and business skills in the field of social auditing, be familiar with domestic accounting standards, independent auditing standards and related economic regulations, master modern social auditing theories, methods and means, and be able to use digital

technology to engage in social auditing practice and management consulting work in accounting firms, enterprises and institutions. After about 5 years of work practice after graduation, the expected goals for students are:

Training objective 1: Possess application skills. Having a solid foundation in humanities, mathematics, big data application and analysis, economics, management, and other fundamental knowledge, mastering the basic theories, methods, and skills in the field of social auditing, enabling students to have strong competitiveness in accounting and certified public accountant qualification exams, mastering scientific research methods, understanding the latest trends and developments in the field of certified public accountants, using professional knowledge to identify and analyze key issues, and drawing conclusions.

Training objective 2: Possess management and communication skills. Understand the basic principles and methods of research and development, production processes, and production management in the aviation manufacturing industry, and be able to undertake enterprise cost management work. Having effective oral communication skills, written professional communication skills, strong interpersonal communication skills, communication and coordination abilities, and a sense of teamwork, capable of effectively completing team collaboration and competent for positions such as middle-level management in enterprises.

Training objective 3: Possess innovative abilities. Being able to identify key issues in the field of social auditing, comprehensively analyze problems, and make evaluations. Having business and critical thinking skills, able to analyze, evaluate, and verify empirical data obtained from enterprises, and write standardized and professional audit reports. On the basis of critical analysis of theoretical and empirical data, express one's understanding and views on the risks and operations of the audit market.

Training objective 4: Possess developmental abilities. Understand the national, social, and commercial environment, and master the basic policies and relevant regulations in the fields of national economy and management; Understand the international cutting-edge trends and differences in the field of certified public accountants, possess an international perspective, and be able to communicate across cultures; Having a passion for exploring the unknown, keen observation ability, rich imagination ability, and lifelong learning ability, able to adapt to social and personal sustainable development.

Training objective 5: Possess professional ethics. Being able to practice socialist core values, identify accounting ethical dilemmas and challenges in the business environment, analyze accounting ethical issues in the business environment, and propose appropriate solutions. Having rich humanistic heritage, sensitive ethical awareness, good professional ethics and social responsibility in social auditing, as well as a high sense of mission towards aviation.

### 3、 Graduation requirements

## **1. Business knowledge**

1.1 Have a solid foundation in humanities, economics, management, and professional knowledge in management accounting, and understand the latest developments and trends in the field of social auditing.

1.2 Have a solid foundation in mathematics, information technology, big data accounting analysis and decision-making, and master scientific research methods.

## **2. Thinking and Innovation**

2.1 Possess discerning thinking and innovative ability. Being able to identify, analyze, question, and evaluate phenomena and issues related to social auditing, draw conclusions, and express personal opinions.

2.2 Possess innovative capabilities. Be able to propose innovative perspectives and solutions on phenomena and issues related to auditing.

## **3. Solve a problem**

3.1 Problem solving. Being able to identify key issues in the field of certified public accountants, comprehensively analyze problems, and make evaluations.

3.2 Have the ability to solve management and control problems in various functional and cross functional departments, conduct comprehensive analysis and research on complex issues in this professional field, provide management consulting, risk control, and risk management, and propose corresponding countermeasures.

## **4. Using tools**

4.1 Able to apply mathematical knowledge, statistical knowledge, information technology means and tools appropriately to solve practical problems.

4.2 Able to apply digital intelligence technology for business processing and conduct big data audit analysis.

## **5. Communication expression**

Has strong communication and expression skills. Being able to communicate effectively through different ways of expression.

## **6. Teamwork**

6.1 Have a good sense of teamwork. Being able to get along harmoniously and collaborate with team members.

6.2 Can effectively play an active role as a member or leader in team activities.

## **7. International Perspective**

7.1 Possess an international perspective and international understanding ability.

7.2 Understand the dynamics of international business management, pay attention to global issues, and understand and respect the differences and diversity of different cultures around the world.

## 8. Lifelong learning

Having the awareness of self-learning and lifelong learning, able to adapt to social and personal sustainable development.

## 9. Comprehensive literacy and values

9.1 Possess humanistic heritage, scientific spirit, professional ethics, and a sense of social responsibility.

9.2 Understand the national and social conditions, and practice the core socialist values.

## 4、 Core courses

Microeconomics, Macroeconomics, Statistics, Finance, Econometrics, Management, Principles of Accounting, Accounting (CPA), Economic Law (CPA), Tax Law (CPA), Audit (CPA), Financial Management (CPA), Cost Management Accounting, Intelligent Accounting, Business Big Data, Corporate Strategy and Risk Management, Asset Evaluation, Accounting Information Systems, etc.

## 5、 Education System and Degree

Duration of study: The basic education system for this major is 4 years, and a flexible education system of 3 to 7 years is implemented.

Conferring degree: Bachelor of Management.

## 6、 Course Structure and Credit Requirements

Students are required to take at least 158.5+5 credits (second class) within the school's designated time frame to graduate. The minimum credit requirements for various courses are shown in the table below.

	132.5 credits for theoretical teaching					Concentrated practical teaching (Compulsory)	second class
	111.5 credits for compulsory courses, accounting for 84.15%, and 21 credits for elective courses, accounting for 15.85%						
	General Education Course		Subject Basic Course	specialized course	Personalized courses		
	Compulsory	take as an elective course					
credit	67.5	4	15.5	24.5	21	26	5
proportion	47%		9.78%	15.46%	13.25%	16.04%	

Table 2: Credit Composition of Curriculum System

Note: "()" refers to the experimental (practical)/computer credits included in various theoretical courses, with a percentage of the total credits, rounded to two decimal places.

## 9、 Study requirements

### 1. Course requirements for "Graduation Thesis"

The course of "Graduation Thesis" is conducted in accordance with the "Management Measures for the Four Year Consistent System of Graduation Thesis (Design) at Zhengzhou Aviation Institute" (School Teaching Letter [2019] No. 24), and adopts a "2+2+8" model, with 2 credits in the 4th and 6th semesters and 8 credits in the 8th semester.

### 2. Personalized course requirements

Personalized course requirements: Group I should take no less than 11.5 credits, and Group II should take no less than 9.5 credits. The courses marked with an asterisk are related to the core courses of this major, and it is recommended that students prioritize their studies.

### 3. Second Class

As one of the eligibility criteria for graduation, students must complete at least 5 credits for extracurricular activities. The second class activities include six categories: ideological growth, group learning experience, practical services, technological innovation, cultural and sports activities, and skill training. It is required that at least three of the six categories of activities do not score zero. The allocation of credits shall be assessed and implemented in accordance with the "Implementation Measures for the Second Class Transcript System for Undergraduate Students at Zhengzhou University of Aeronautical Industry Management (Trial)".

### 4. Special focus on aesthetic education

At least 2 credits must be taken in 8 courses including music appreciation, art appreciation, film and television appreciation, drama appreciation, dance appreciation, calligraphy appreciation, opera appreciation, and art introduction.

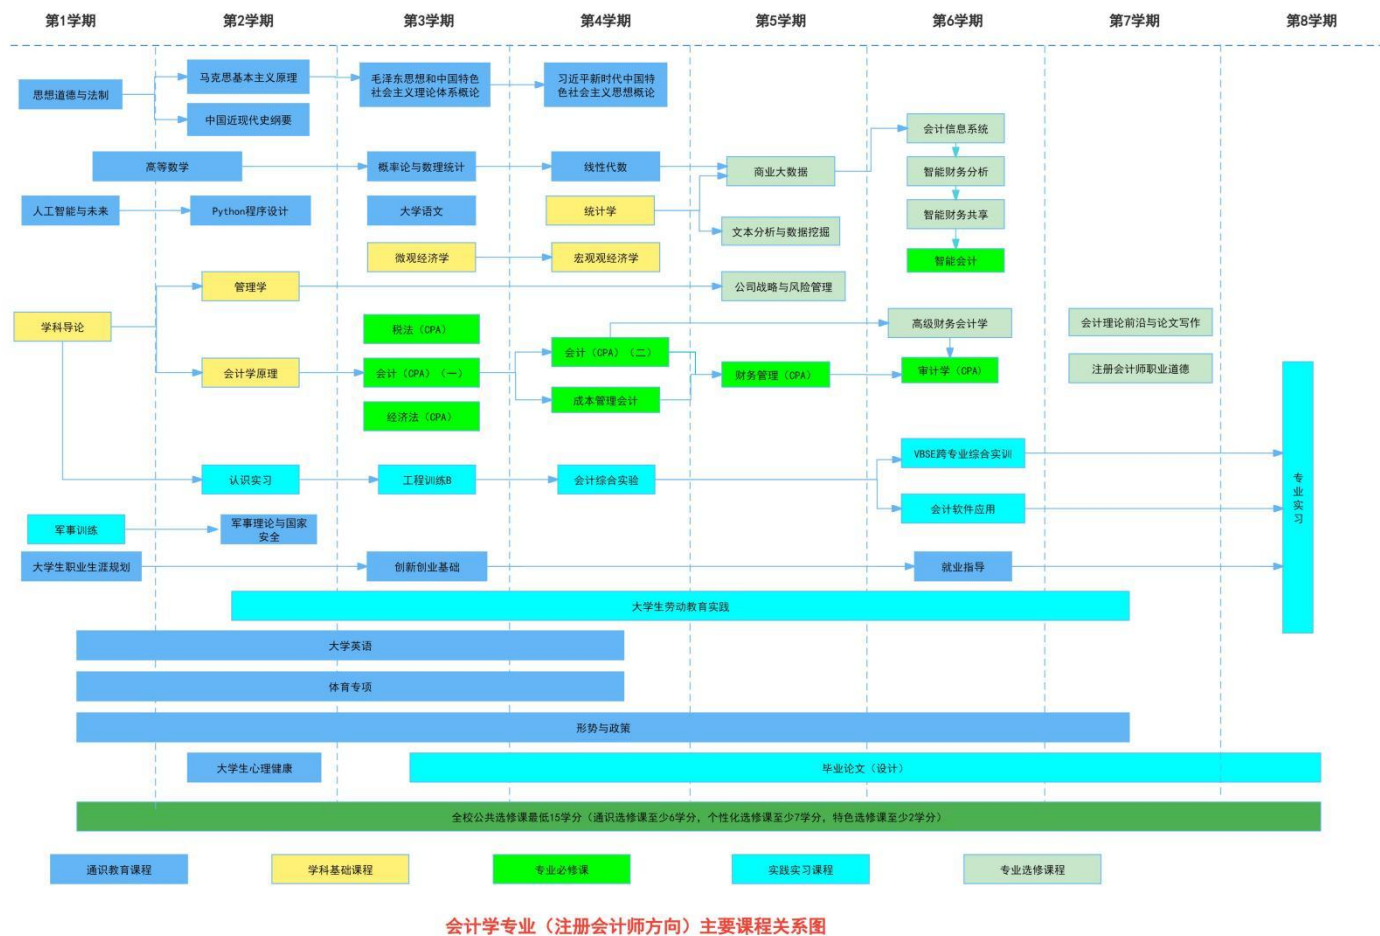

### 5. Special Project on Four Histories

The Four Histories Special Program includes the history of the Communist Party of China, the history of New China, the history of reform and opening up, and the history of socialist development. At least one credit must be taken and completed in the first and second year of college.

### 6. Labor education

Labor education includes two parts: labor education theory courses and labor practice, totaling 32 class hours. The labor education theory course (8 class hours) is based on the compulsory general courses "Basic Principles of Marxism" (4 class hours) and "Ideological and Moral Education and Rule of Law" (4 class hours). Labor practice is offered based on the compulsory general course "Fundamentals of Innovation and Entrepreneurship" and the public course "Engineering Training B" in the concentrated practical teaching segment. Among them, "Fundamentals of Innovation and Entrepreneurship" offers 8 hours of labor practice, and "Engineering Training B" offers 16 hours of labor practice.
