1.COST AND MANAGEMENT ACCOUNTING, Sun
Maozhu, Yu Fusheng, Renmin University of China Press,
Edition 2018, 3
Cost Management Accounting is the core course of the accounting discipline system. It combines accounting and management directly, and analyses the whole process of enterprise operation activities through the processing of
related information. Through the study of this course, students are able to comprehensively and systematically understand the basic knowledge and theory of cost management accounting, master the basic methods of cost accounting, forecasting, decision-making, control and evaluation, and analyse and solve specific problems in operation and management. This will enhance students' awareness of strategic thinking and improve their comprehensive literacy and management level.

Торі	c Outline:	Hours/Minutes
I.	Overview of cost management accounting	2
A.	Meaning of cost management accounting:	
	① The concept of cost	
	② Meaning of cost management accounting	
В.	The emergence and development of cost management accou	nting
С.	Content and characteristics of cost management accounting	
II.	Classification of costs	4
A.	Cost classification in the financial accounting system:	
	① Classification of costs by economic use	
	② Costs are categorised by business objectives	
В.	Cost classification in management accounting systems:	
	① Costs are categorised by the relationship between	cost nature and
	decision making	
III.	Basis of cost accounting	2
А.	Principles and requirements for cost accounting	
В.	Product costing process	

	② Accounting entries set up for product costing
IV.	Cost aggregation and allocation 8
A.	Collection and allocation of material costs
B.	Collection and allocation of labour costs
C.	Recovery and allocation of depreciation expense
D.	Collection and allocation of other expenses
E.	Collection and allocation of auxiliary production costs
	1)Characteristics of accounting for auxiliary production costs
	2 Method of allocation of auxiliary production costs
	③Accounting treatment related to the allocation of auxiliary producosts
F.	Collection and allocation of manufacturing overheads
	①The concept of manufacturing overheads and what they include
	2 Grouping of manufacturing overheads
	3 Method of allocating manufacturing costs and related account
	treatment
G.	Accounting for loss-making expensesAccounting for loss-making expen
	①Concepts of scrap, scrap loss, and downtime loss
	②Elements of accounting for scrap losses
	3 Calculation of loss of irreparable scrap and related accounting treatme
	(4) Accounting for work stoppage losses
H.	Allocation of production costs between finished products and wor
	progress
	(1)approximate yield method
	2 Allocation of products in process on the basis of the fixed costing me
	and the fixed proportionality method
	³ Accounting for finished product cost carry-forwards
V.	Product Costing 8
A.	Types of production and product costing
B.	variety law
	1)The concept of variety law
	2 Characteristics of the variety law
	③Calculation procedure for the variety law
	④Scope of application of the variety law
C.	batch method
	①Concept of the batch method
	2 Characteristics and calculations of the simplified batch method
	③Scope of application of the batch method
D.	Step-by-step approach
	①The concept of the step-by-step approach
	2 Characteristics and specific calculations of the step-by-step method
	progressive carry-over
	③Characteristics and specific calculations of the step-by-step metho

	parallel carry-over		
	④Scope of application of the step-by-step approach		
E.	Other calculation methods		
VI.	Product Cost Report	2	
A.	Overview of product cost reporting		
B.	Product cost statements		
	① System components of product cost statements		
	2 Methods of preparing product cost statements		
C.	Product cost analysis		
	① The significance and tasks of product cost analysis		
	2 Specific process of analysing product costs		
	③ factor analysis approach		
VII.	Fundamentals of decision-making accounting 8		
\ .	Cost pattern analysis		
	①Concept of cost behaviour		
	2 Classification of cost patterns		
	③Analyses using cost patterns		
З.	variable cost approach		
	①Concept of variable cost		
	² Components of variable costs and their calculation		
	③Difference and link between variable cost and full cost		
C.	③Difference and link between variable cost and full cost principal-volume profit analysis		
2.			
ς.	principal-volume profit analysis	lysis	
С.	principal-volume profit analysis ①Concept and significance of principal-volume profit analysis	llysis	
С.	principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit ana	llysis	
	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit analysis ③Calculation of the break-even threshold 	llysis	
	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit analysis ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate 	ılysis	
).	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit ana ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor 	llysis	
) . /III.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit anal ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making 		
D. /III. A.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit anal ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions 		
). /III. A.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit analysis ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions 		
). /III. 4. 8.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit anal ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing decision analysis 		
D. /III. 4. 3.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit anal ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing decision analysis ①Pricing methodology 		
D. √IIII. Ą. 3.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit anal ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing methodology Production decision analysis 		
). /III. A. 3.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit anal ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing decision analysis ①Pricing methodology Production decision analysis ①Elements of production decisions analysis 		
). /III. 3. 3.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit anal ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing methodology Production decision analysis ①Elements of production decisions analysis ②Characteristics of production decisions analysis 		
D. /III. A. 3. 2, X.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit ana ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing decision analysis ①Pricing methodology Production decision analysis ③Characteristics of production decisions analysis ③Methods of production decisions analysis 	8	
D. /III. A. 3. 2, X.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit anal ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing decision analysis ①Pricing methodology Production decision analysis ③Lelements of production decisions analysis ③Methods of production decisions analysis full budget management 	8	
). /III. 3. 2, X.	 principal-volume profit analysis 1)Concept and significance of principal-volume profit analysis 2)Analysed using the basic formulae of principal-volume profit anal 3)Calculation of the break-even threshold 3)Margin of safety and capital preservation rate 4)Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing decision analysis 1)Pricing methodology Production decision analysis 2)Characteristics of production decisions analysis 3)Methods of production decisions analysis full budget management Overview of the full budget 	8	
 <u>></u>. √III. A. B. C, X. A. 	principal-volume profit analysis①Concept and significance of principal-volume profit analysis②Analysed using the basic formulae of principal-volume profit anal③Calculation of the break-even threshold③Margin of safety and capital preservation rate④Operating leverage factorQuantitative basis of accounting for decision-makingShort-term business decisionsOverview of decision-making and short-term business decisionsPricing decision analysis①Pricing methodologyProduction decision analysis②Characteristics of production decisions analysis③Methods of production decisions analysisfull budget managementOverview of the full budget	8	
C. D. VIII. A. B. C, IX. A. B. C.	 principal-volume profit analysis ①Concept and significance of principal-volume profit analysis ②Analysed using the basic formulae of principal-volume profit ana ③Calculation of the break-even threshold ③Margin of safety and capital preservation rate ④Operating leverage factor Quantitative basis of accounting for decision-making Short-term business decisions Overview of decision-making and short-term business decisions Pricing methodology Production decision analysis ①Elements of production decisions analysis ③Methods of production decisions analysis full budget management Overview of the full budget ②Concept and role of the full budget ②Specific elements of a traditional full budget system 	8	
D. VIII. A. B. C, IX. A. B.	principal-volume profit analysis①Concept and significance of principal-volume profit analysis②Analysed using the basic formulae of principal-volume profit anal③Calculation of the break-even threshold③Margin of safety and capital preservation rate④Operating leverage factorQuantitative basis of accounting for decision-makingShort-term business decisionsOverview of decision-making and short-term business decisionsPricing methodologyProduction decision analysis①Lements of production decisions analysis③Methods of production decisions analysis③Methods of production decisions analysisfull budget managementOverview of the full budget①Concept and role of the full budget②Specific elements of a traditional full budget systemPrinciples of full budgeting	8	

	③Characteristics and operational techniques of specific methods such as
	flexible, zero-based and rolling budgets
D.	Implementation and appraisal of the full budget
Х.	cost control 6
A.	Strategic cost management
	①Concepts related to strategic management accounting
	2 Principles of Strategic Management Accounting
	③Relationship between cost management and strategic positioning
B.	Target Cost Control
	①Concept of target cost control
	②Principles of target cost control
C.	Standard cost control
	Standard cost variance analysis and control
	②Accounting for differences
D.	Job Cost Control
	①Concepts Related to Job Costing
	ODifferences between job costing and traditional costing methods
	③Calculation of job costs
XI.	Performance evaluation 4
A.	Economic value added
	(1)Relationship between organisational objectives and performance
	evaluation
	2 Classification of responsibility centres and control of the focus of each
	centre
	③Internal clearing prices for performance evaluation
	(4) Calculation of economic value added
В.	balanced scorecard
	①Fundamentals of the Balanced Scorecard
	2 Application of the balanced scorecard

Total Sessions (Coverage Hours)56
