<u>Course Description:</u>	<p>The course "Economic Law (CPA)" is a professional elective course for undergraduate majors in Accounting (Certified Public Accountant). The textbook is a designated textbook for the current year's Certified Public Accountant exam, compiled based on the latest judicial interpretations of laws and regulations. The course mainly introduces relevant economic laws and regulations in current market economic activities. The course "Economic Law (CPA)" discusses the basic theories of civil law, commercial law, and economic law, Comprehensively explained the important theories of civil and commercial law, as well as the institutional, theoretical, and practical issues of economic law subjects, market supervision laws, and macroeconomic regulation laws. The Economic Law (CPA) takes the inherent universal laws of various economic law phenomena as the research object, combines various departments and individual laws of economic law, and examines them as a whole. The focus is on revealing the most basic and general principles of economic law, which is a theoretical summary of the inherent universal laws of various economic law phenomena. Mastering the relevant content of Economic Law (CPA) is a prerequisite and foundation for students to further learn professional courses, and it is also the key for students to comprehensively and systematically learn and master the theory, system, and practice of economic law, and guide students to establish a correct outlook on life, values, and the world.</p> <p>This course focuses on broadening students' horizons, improving their theoretical level of economic law, and their</p>

ability to engage in practical economic law. The requirements for studying this course are to understand and master basic legal theories, integrate theory with practice, and combine the latest economic law theories with the practice of enterprises, so that students can integrate the knowledge system they have learned after studying this course, achieve practical application of what they have learned, and comprehensively apply civil law, commercial law, and economic law; Summarize, analyze, and summarize the laws related to enterprise operations, and effectively identify and respond to various legal risks that may be encountered during the business process. This course holds a relatively important position in the discipline system of accounting. The purpose of this course is to enable students to comprehensively grasp the basic principles, rules, and application methods of civil law, commercial law, and economic law, laying a solid foundation for improving their problem-solving ability in future accounting work.

Topic Outline:		Hours/Minutes
